3.Software Preparation

This section will guide you through downloading and flashing the software and firmware required for the LAFVIN ESP32S3 AIChatBot.

Flashing Software and Bin File Download

1. You can visit our repository: GitHub Repository or directly download the zip package from this link
2. The downloaded zip package includes the latest bin firmware, flashing tool, and drivers.
3. Save the downloaded firmware files to a location on your computer that is easy to access.

Before flashing, let's ensure that the drivers are correctly installed. Please refer to Driver Installation for driver installation instructions.
